Non-covered Services – REFRACTION FEE - \$60

REFRACTION is the process of determining your best-corrected vision and/or providing a prescription for glasses.

Medicare considers this service routine and therefore a non-covered service. Since commercial insurances follow most federal government policies, they also consider a refraction a routine service not covered by Medical insurance. Per CMS we are required to collect these fees if we provide the service, as failure to bill for non-covered service and deductibles is considered fraudulent.

Our fee for a refraction is \$60 and it is collected at the time of service in addition to any co-payments required.
